

Diving into Mastery - Diving

Adult Guidance with Question Prompts

Children recognise number bonds from different images. They write the number bond as a calculation in two ways. They also write the calculation with the total at the beginning. Children should be able to use their number bonds within ten to help them work out number bonds within 20. They work systematically to find all the number bonds for 14, using equipment to support them where necessary.

What can you see in the picture?

What is the total?

What are the parts?

Can you use number bonds to ten to help you?

How will you write the calculation?

Are there two ways?

Can we write the total first in an addition calculation?

How will you find all the number bonds to 14?

What strategy will you use?

How can you be sure you have found them all?

Find and Make Number Bonds

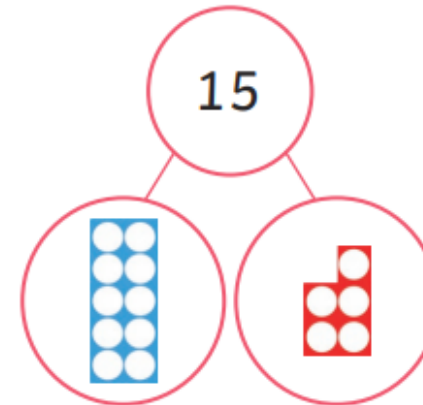

What number bonds are shown by the pictures?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} = \underline{\quad} + \underline{\quad}$$

$$\underline{\quad} = \underline{\quad} + \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

Following the pattern of the numbers, can you write all the number bonds to 14?
