

05.01.21 LO: Measure using non-standard units - optional extension

Try all or some of these challenges by measuring them out in non-standard units. At school we would use cubes, but you could use pasta tubes, lego bricks (if all the same size), crayons (again if the same size) or any other small objects that are the same size.

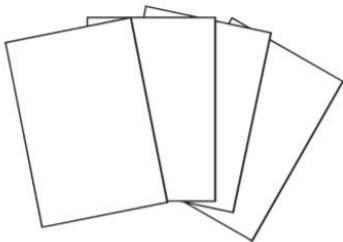

Measuring Length

How long is a stick of spaghetti? Is it the same length after it has been cooked?

Measuring Length

Take an A4 piece of paper and measure it. What are the dimensions? Can you invent a new paper size?

Measuring Length

Measure some shoes. Make a table comparing shoe size to length of shoe. Can you predict how long bigger shoes would be?

Measuring Length

How many steps does it take you to reach the door?  
How about to the doorway of another room?
