09.02.21 Fluency ANSWERS

Fact of the day 50÷2= 25

a.   Which is shorter?

50cm   <mark>50mm</mark>   50m

b.   A bag of chips cost £2.70. How much change will you get from two £2 coins?

£1.30

c.   There are 40 tomatoes in a greenhouse. ¾ of the tomatoes are taken to market. How many are left in the greenhouse?

¼ of 40 is 10 (40 divided by 4)   so ¾ is 10x3=30 There would be 10 left

40			

d.   Make 75p in two different ways. Draw the coins you would use:

There are lots of answers here:

For example: 50p+20p +5p   or 10p + 20p+20p+20p+2p+2p+1p
