LO: Understanding electrical safety

Click on the link below. Can you find all the dangers with electricity in the house? Write down all the dangers that are identified in the house.

<https://www.switchedonkids.org.uk/electrical-safety-in-your-home>

Today you are going to create a poster focussing on one of the dangers you saw in the virtual house. You will be warning children and staff of what not to do and what to be careful of.

You need to think about:

1. Where your poster will be displayed in school e.g. near a plug, near the toilets.
2. Catching the reader's attention, without too many words.
3. Colours, create an eye-catching poster.
4. Your warning poster must be clear and uncomplicated

Focus on your presentation as your poster will be displayed around school.
