

Friday 19th June 2020 WALT: Tenth

Look at how this poster has been created.

Make up you own poster to show any of the following:

0.1	0.2	0.4	0.5	0.6	0.7	0.8	0.9
-----	-----	-----	-----	-----	-----	-----	-----

You could draw sweets, or whatever you like, instead of fish.

Remember your number line must start at zero and end at 1 with 10 equal intervals.

To find out the %, multiply the numerator by 10. i.e. $\frac{3}{10}$ ($3 \times 10=30\%$)
