

## Home Learning Challenges – Tawny Owls and Woodpecker Class

### Autumn Term 2

**Text: 'Where Once We Stood' by Christopher Riley and Martin Impey**

### Our Planet and Beyond

You can choose how you would like to present your homework. We are looking forward to seeing your homework completed to a high standard.

Research a planet of your choice and make a list of facts.	Art – create a space related art piece. This could be a painting, collage or using pastels. You could even make a 3D planet!	Learn as many capital cities around the world as you can. You could focus on capital cities in a specific continent e.g. Europe, Africa, South America.	Research about a capital city of your choice and compare it to our capital city, London.	Research the UK's exports and imports – what do we bring into our country and what do we sell to other parts of the world?
Write a poem about space.	A day on the International Space Station. Write a diary of a day in the life of an astronaut – you might want to find out what life is like beforehand.	Investigate the layers of our planet and present it in an interesting way. 	Draw a bar chart comparing the populations of cities or other features such as climate: amount of rainfall / temperature through the year.	
Write a science fiction story about an adventure in space.	Draw the flags of 10 countries and write down their capital cities.	Design a new flag to represent England. Design a flag to represent Wellington or our school. Think about what makes it special.	Research how you become an astronaut. What do you need to study? What skills will you need? Where can you train?
