

Wednesday 13.01.21 Maths Fluency - Answers

Those questions with (M) beside them should be tried mentally. Those with (W) are normally more efficient using a written method.

1) $\frac{1}{3}$ of 48 = 16 (M/W)

16	16	16
----	----	----

2) $56 = ? \times 8$ 7 (M)

3) 3,393 = 4536 - 1143 (W)

4) $217 - 168 = 49$ (W) (use the inverse $217 - 49$)

5) $52 \div 4 = 13$ (W/M)
