

Wednesday 20.01.21 Maths Fluency

Those questions with (M) beside them should be tried mentally. Those with (W) are normally more efficient using a written method.

1 $\frac{2}{3}$ of 99 =

(M/W)

2 $700 + \square = 1,300$

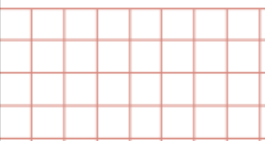

(M)

3 $7,543 - 5,636 =$

(W)

4 $765 \times 10 =$

(M)

5 $873 \times 8 =$

(W)
