

Friday 22.04.21 Maths Fluency

Those questions with (M) beside them should be tried mentally. Those with (W) are normally more efficient using a written method.

1 $70 \times 7 =$

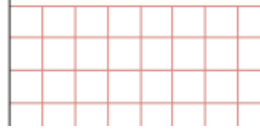

(M)

2 $6,657 \times 8 =$

(W)

3 $\frac{5}{6}$ of 66 =

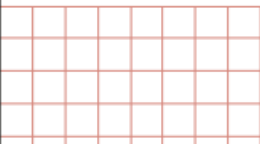

(M)

66 divided between 6 groups and you have 5 of them

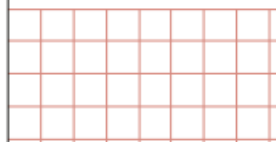

4 $60 \times 50 =$

(M)

5 $607 \div 8 =$

(W)
