

## Friday 22.01.21 Maths Fluency

Those questions with (M) beside them should be tried mentally. Those with (W) are normally more efficient using a written method.

Answers:

1  $70 \times 7 =$

(M) **490**

2  $6,657 \times 8 =$

(W) **53,256**

3  $\frac{5}{6}$  of 66 =

(M) **55**

66 divided between 6 groups = 11 and you have 5 of them ( $5 \times 11 = 55$ )

11	11	11	11	11	11
----	----	----	----	----	----

4  $60 \times 50 =$

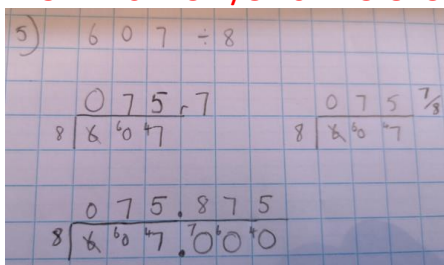

(M) **3000 (6x5 = 30 then x by 100)**

5  $607 \div 8 =$

(W)

**75 r7 or  $75 \frac{7}{8}$  or 75.875**

5)  $607 \div 8$

$075 \text{ r } 7$        $075 \frac{7}{8}$

$8 \overline{) 607}$        $8 \overline{) 607}$

$075.875$

$8 \overline{) 607.000}$
