

Thursday 30.04.20 Maths Fluency

Those questions with (M) beside them should be tried mentally. Those with (W) are normally more efficient using a written method.

Answers:

1	$\frac{2}{5}$ of 60 =
	

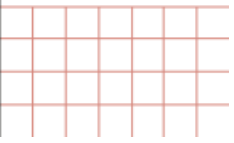

(M/W) 24

2	$32,764 - 21,863 =$
	

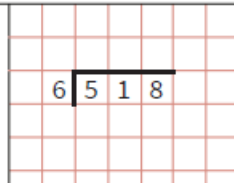

(W) 10,901

3	$56 \div 10 =$
	

(M) 5.6

4	$80 - 28 =$
	

(M) 52

5	
---	---

(W) 86 r 2 or 86 $\frac{2}{6}$ ($\frac{1}{3}$ simplified) or 86.33
