

STUDENT SHEET 4b: HOW MUCH IS THE SEA WORTH? (9-11)

Jobs

Outcome 3 - Use the bar chart for information.

The graph shows the number of people that work in the different industries.

1 - How many people work in the shipping industry?

.....

2 - Which industry has the most people working in it?

.....

3 - How many more people work in energy than fishing?

.....

STUDENT SHEET 4b: HOW MUCH IS THE SEA WORTH? (9-11)

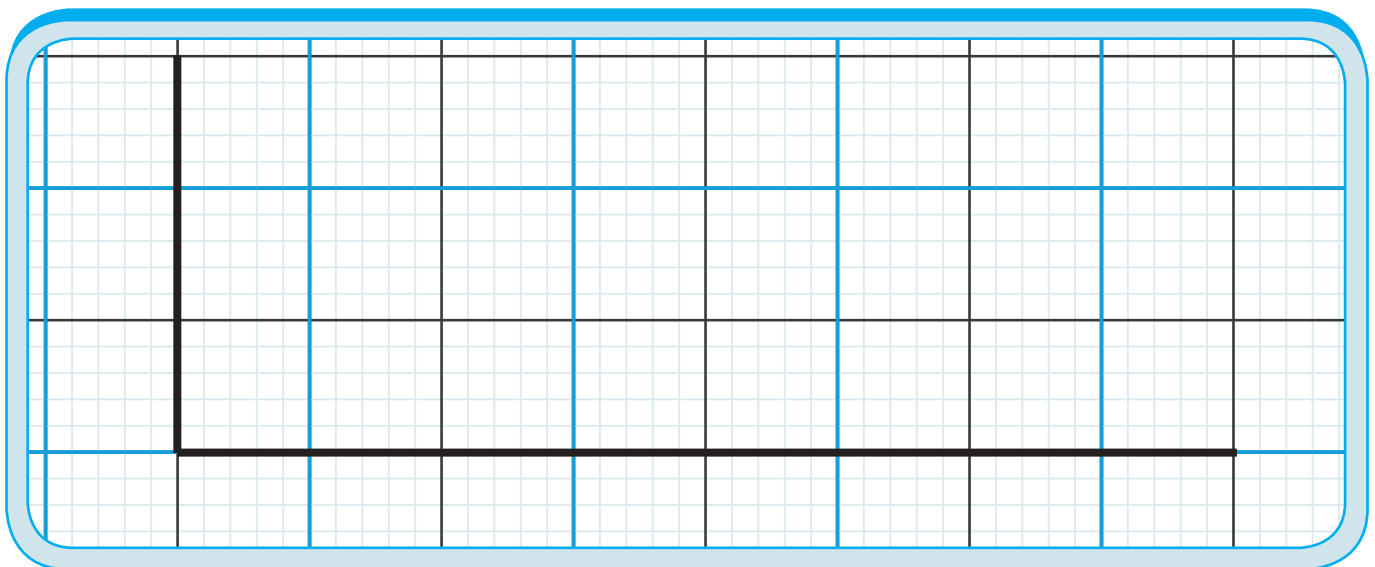

Value

The table shows the amount of money four of the industries make each year.

Industry	Energy	Shipping	Tourism and leisure	Fishing
Money made (billions)	1.0	13.0	3.6	0.9

Outcome 4 - draw a bar chart on your own.

4 - Draw a bar chart to show this. Use the graph paper below.

Outcome 5 - Make a conclusion.

**“In total, just over £18.5 billion was made by marine industries.
The fishing industry made £0.9 billion of this.”**

Use the information above and your graph to help you answer the next two questions.

5 - Does the information support your prediction?

.....

6 - Explain your answer to question 5.

.....

Outcome 6 - Work out percentages.

7 - What percentage of the money made by marine industries comes from energy?

.....
