

## Friday 26.06.20 Maths Fluency

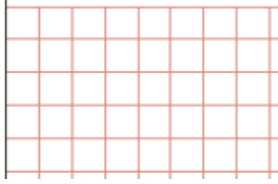

Those questions with (M) beside them should be tried mentally. Those with (W) are normally more efficient using a written method.

1  $3 \times 0 \times 7 =$

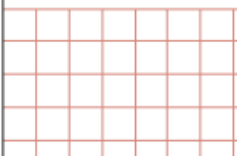

(M)

2  $294 \times 6 =$

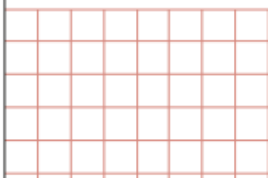

(W)

3  $80 - 48 =$

(M)

4  $\frac{5}{6}$  of 42 =

(M)

5  - 7,876 = 7,997

(W)
