

Otters and Squirrels - Summer Term 2 Pre-learning task - Natural Disasters

Your task is to create a volcano and label its parts. This will link to our continued Geography topic next half term about natural disasters.

Think carefully about the different parts of a volcano, such as:

- magma chamber
- vent
- lava
- crater
- ash cloud

You should clearly label each part on your volcano.

You may create your volcano in any way you choose, for example:

- a drawing
- a painting
- using Purple Mash
- a 3D model

We look forward to seeing your fantastic volcano creations!

Please bring in your pre-learning task by **Wednesday 3rd June 2026**.
