

## Optional Home Learning Challenges: Kingfisher Class

### Summer 2: Geography: Farming around the world

*How does farming in the UK compare to the ways food is grown in other parts of the world?*

How is food grown in different places around the world?

Which foods can only be grown in certain countries, due to their climates?

Explore staple foods and traditional dishes from around the world

Explore different growing methods- including 'vertical farming'

Hydroponics: which foods can grow in water and don't need soil?

How is new technology helping the productivity of crops?

Are there any local allotments in your area?

Is farming more or less productive in highly populated areas?
