

Teeth

Teeth are different shapes and sizes depending on their function. The size and shape of the teeth of an animal vary depending on the food they eat.

The Digestive System

The digestive system is a group of organs that get food in and out of the body and which make use of the food to keep the body healthy.

Food Chains

The arrows in a food chain show the flow of energy.

Producer	Prey	Predator/Prey	Predator
	Consumer	Consumer	Consumer
	Herbivore	Carnivore	Carnivore
